

Balloon

Rules

Introduction

In Balloon, the Player will attempt to increase a multiplier on their base wager. The Player's multiplier is portrayed as a balloon that the Player will inflate. The Player must cash out before the balloon pops to be paid. The multiplier will continue to grow until the Player chooses to cash out, reaches the maximum multiplier, or the game ends. If the game ends without the player winning, the wager will be forfeited. If the Player's multiplier reaches 100x, the game will end with the player receiving a payout of 100x their base wager.

How To Bet

Initial Bet

On the initial round, the following betting options are available to the Player:

Option	Result
BET AMOUNT	Allows the Player to manually change the amount of their bet.
PLACE WAGER	Begins the game after a bet has been placed.
Ø	Resets the BET AMOUNT to \$1.00.
X2	Doubles the amount of the bet currently placed.

- (1) At the start of the round, the Player enters a wager and selects *Place Wager* to start the game.
- (2) After *Place Wager* is selected, the inflation valve will illuminate allowing the game to begin. The Player will then attempt to inflate the balloon by using one of the following methods. The default method is *Hold and Release*, but other methods can be selected from the Options Menu.
 - (a) Hold & Release (Default): Hold down the valve to inflate. Release to cash out.
 - (b) Hold & Release with Timer: Hold down the valve to inflate. Releasing the valve will start a countdown timer. Within the countdown, the Player must either continue inflating or cash out. If timer reaches zero, the Player will cash out at the current multiplier.
 - (c) Press for an Air Burst: Each press of the valve will increase the multiplier or cause the balloon to burst, ending the game.
- (3) After placing their wager and before inflating the balloon, the Player may cancel their wager by selecting *Cancel Wager*.
- (4) The Player may change their balloon shape and color between rounds by selecting the balloon icon in the upper left corner of the screen, or from the settings tab.

Payouts

Winning bets are paid by multiplying the base wager by the multiplier the Player successfully reached when cashing out.

Betting Again

After each round, the following options are available to the Player:

Option	Result
BET AMOUNT	Allows the Player to manually change the amount of their bet.
PLACE WAGER	Begins the game after a bet has been placed.
Ø	Resets the BET AMOUNT to \$1.00.
X2	Doubles the amount of the bet currently placed.

Resuming Round

If the game connection is interrupted in the middle of the round, upon relaunching the game, the Player will have the choice to either cash out or continue to inflate the balloon.

If the Player cashes out, the game will end and the player will be paid their initial wager multiplied by the displayed multiplier. If the Player wishes to continue playing that round, the game will switch into whatever gamemode was active when gameplay was interrupted.

Additional Rules

Malfunction voids all pays and plays.

Latency may affect visuals. Please ensure a reliable connection.

Options
