How to Play Baccarat

Game Overview

Baccarat is a card game played using eight standard 52-card decks.

The game consists of two hands, Player and Banker.

Each card has a represented point value.

The value of a hand is determined by adding together the point value of each card within each hand. Anytime a hand total exceeds 9, the tens digit of the hand total is ignored (13 = ~~1~~3 = 3).

The initial hand value (two cards) will determine whether a third card will be drawn for each hand (see 3rd Card Determination below).

After both hands have achieved their final total, the higher hand will be declared the winner.

In the case of a tie the Player and Banker bets will "push".

Card Point Value

There are four suits of cards: Spades, Hearts, Diamonds and Clubs. All suits have the same value. The following chart indicates the point values of each card:

Card	Point Value
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9
10	0
Jack	0
Queen	0
King	0
Ace	1

3rd Card Determination

Initial (two card) hand values determine whether a 3rd card is drawn for either or both the Player and Banker hands:

If either the Player or Banker have 8 or 9 points (referred to as a "natural"), no additional cards are drawn for either hand.

If the Player's total is 6 or 7 points, the Player stands, and Banker acts as follows:

If the Banker hand total is 5 or less, then the Banker hand will draw a third card.

If the Banker hand total is 6 or 7 points, the Banker will stand.

If the Player's total is 5 or less, then the Player hand will draw one additional card. Banker hand draws or stands depending on the value of the newly drawn Player card, as indicated in the following table:

		PLAYER'S THIRD CARD VALUE									
BANKER'S HAND VALUE		0	1	2	3	4	5	6	7	8	9
	9	S	S	S	S	S	S	S	S	S	S
	8	S	S	S	S	S	S	S	S	S	S
	7	S	S	S	S	S	S	S	S	S	S
