Multiseat Blackjack with side bets

Game Rules

Multiseat Blackjack with side bets is offered with eight decks and up to 7 seats.

How to Bet

Initial Bet

To place a new bet:

1. The Player can select any of the available chips located on the bottom of the screen. Each chip represents a different denomination.
2. Select a chip and place it on the betting position. You can place several chips on different betting locations simultaneously.
    a. First, you must place the main bet, and then you get to place the optional side bets.
3. Once the game's minimum bet is reached, the Player can begin the game by pressing the *DEAL* button.

While betting the following betting options are available to the Player:

Option	Result
DEAL	Will begin game.
UNDO	Remove last bet placed on the table.
DOUBLE BET	Doubles the amount of the bet currently placed. If configured, clicking Double Bet will trigger a confirmation popup, allowing the player to confirm or cancel their choice.

Betting Again

After each game, the player can place bets again or use the following options to play another round:

Option	Result
REBET	Returns the player to the betting interface with a bet equal to their previous bet.
UNDO	Removes the last bet placed on the table.
DOUBLE REBET	Returns the player to the betting interface with a bet equal to double their previous bet. If configured, clicking Double Bet will trigger a confirmation popup, allowing the player to confirm or cancel their choice.

After the player completes their hand they can also select the *Rebet Next Round* button to secure their seat and place a bet equal to their previous.

How to Play Blackjack

Game Overview

- Blackjack is a card game played using eight standard 52-card playing decks.
- A hand is the combination of the cards dealt.
- The game is designed for a single player who can occupy up to 7 seats. Each seat can potentially split into two hands, all playing against the dealer.
- Each card had a represented point value.
- The value of a hand is determined by adding together the point value of each card within the hand.
- The Player's objective is to have a hand value that is greater than the Dealer's hand value.
- If a hand exceeds 21 points, the hand "busts" and automatically loses.
- A hand containing an ace and any 10-point card is called a Blackjack. It is the highest hand and outranks any other 21-point hands.
- Dealer must stand on all 17's. This includes soft values where an Ace is worth 11.
- All winnings are added to balance at the end of each game round.

Card Point Value

There are four suits of cards: Hearts, Spades, Clubs, and Diamonds. All suits have the same value. The follow chat indicates the point values of each card:

Card	Point Value
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9
10	10
Jack	10
Queen	10
King	10
Ace	1 or 11

Aces are worth 11 points unless they would cause the hand to bust then their value decreases to 1 point.

Playing a Hand

1. After the Player has initiated the game, two cards are dealt to all active seats and the Dealer in clockwise order beginning with the seat to the right of the screen. The Dealer receives their first card facedown. All other cards dealt are faceup.
2. If the two cards dealt to either any Player or the Dealer, have a sum equal to 21 that hand is a "Blackjack" and automatically wins.
3. If the Dealer's faceup card is an Ace, the game offers the Blackjack Insurance side bet.
4. After the Blackjack Insurance side bet is made, the Dealer checks their facedown card. If the Dealer, has Blackjack the game ends.
5. If the Player nor the Dealer have Blackjack, the Player can attempt to improve the outcome of their hand by:

Player Action	Result
Hit	Draw another card from the deck and adds the point value to the hand. Player can continue to hit until the hand value becomes 21 or more. If the hand value becomes 21, the hand automatically stands. If the hand busts, all bets placed on that hand are forfeited.
Split	This action is only available when the initial two cards dealt are the same value. When pressed, an additional bet equal to the main bet is placed and the two cards are separated into two hands. Split Aces can only receive one card per split hand. You may draw as many cards as you like on a non ace split hand.
Double Down	This action is available for the first two cards of any hand. Doubles the main bet and draw exactly one more card. The first two cards of a split hand can be Doubled Down, except for Split Aces.
Double Blind	This action follows the same rules and flow as the Double Down Action. However, the card dealt to the player remains face down until after the dealer's hand is completed. The dealer then reveals the card. The first two cards of a split hand can be Doubled Down, except for Split Aces.
Surrender	This allows the user to forfeit half their wager after the initial two cards and no longer play in the round.

6. If the Player is satisfied with the current value of their hand, they may choose the following action:

Player Action	Result
Stand	Indicates that the Player wishes to draw no additional cards

7. When Player's actions are complete, the Dealer reveals the facedown card.
8. The Dealer draws until the value of their hand is 17 or higher. If the Dealer's hand value exceeds 21, the Dealer busts and all non-busted hands win.
9. Compare the Dealer's hand to each non-busted hand to determine the winning hand. Only the highest values that are less than 21 are used for each hand.

Hand Result	Result
Player's Hand is Higher	The Player wins and is paid 1 to 1.
Dealer's Hand is Higher	The Dealer wins, and the Player's bet is forfeited.
Tie	The bet for that hand "pushes" and is returned to the Player.

Getting a Blackjack

If the two initial cards dealt to either the Player or the Dealer, equal a sum of 21 that hand is a "Blackjack".

Who has Blackjack?	Result
Player	Player automatically wins and is paid 3 to 2 on the main bet.
Dealer	Dealer automatically wins, and the Player's main bet is forfeited.
Both Player and Dealer	This is a tie and the Player's bet is returned.

Blackjack Insurance Side Bet

Blackjack Insurance is a side bet offered by the game when the Dealer's faceup card is an Ace. If the Player accepts the Insurance bet offer, another bet equal to half the main bet is placed before the Dealer's hand is checked for Blackjack.

Dealer's Hand Result	Result	Insurance Bet Outcome
Blackjack	Forfeited	Paid 2 to 1
Not Blackjack	Remains active	Forfeited

If the game supports *Multi seat* feature, insurance is applied on all the positions that you have occupied.

If the Dealer's face-up card is a 10-value card, the Dealer's face-down card is checked without any Insurance bet offer.

Additional Rules

Limits

The limit ranges displayed next to the table name in the Lobby and on the game table interfaceI correspond to Blackjack's main position bet limits.

The following bets have their own limits: Main bet, Perfect pairs, 21+3 and Dealer bust.

Dealing Style

Card dealing style affects the sequence of insurance and action rounds:

In case of US dealing style, insurance is offered when both you and the dealer have received the second card and the dealer shows an Ace as their first card in their hand. The

dealer checks for a Blackjack directly after the insurance round, and if they have a Blackjack, the game round is ended before action time.

Betting & Disconnect Disclaimer

Canceled Games

A game round can be canceled in case of complications that disturb the session. All the players who are currently playing will be notified of the cancellation and all bets will be refunded into their accounts.

Error Handling

Misuse or malfunction voids all pays and plays.

We make every effort to ensure that the information displayed to you and on the gaming platform with regards to the events is accurate. However, this is to be used for guidance only. Due to the nature of the event and the nature of the Internet, latency may occur. The game is designed to ensure that players are neither advantaged nor disadvantaged due to potential latency.

Disconnections

If you are disconnected from the Internet in the middle of a game while playing please re-establish your Internet connection and log back into the game lobby.

If you did not complete all required actions, the system will hold the game state for 30 days and then pick the actions for you based on best strategy, the game is resolved offline and you can view the results of the round in the game history. Note that side bets are resolved based on the game outcome.

Additional Features

Multi Seat Feature

You can occupy multiple seats at the game table and make separate bets on each position. If you do not have confirmed bets on the table, you can change seats between and during game rounds. If you have confirmed bets on the table, you can take and leave seats where you have not placed bets.

Hit/double down/double blind Warning

- If the player elects to hit and their total is equal or greater than 17 then they will provide a warning message
- The message will prompt and display after the user clicks HIT the first time
- Text: "You have [hand value]. Are you sure you want to Hit?"
- Buttons: "No"/"Yes"
- Please add check box - "Do not show again" (it can be locally "saved")
    - Add "setting" option - "Show HIT confirmation message" with toggle show/hide
- If no action taken a Stand will be preform when timer ends.

Side Bets

These are wagers that you can make beyond the main game bet. These cannot be placed without the main bet. A breakdown of payouts for each side bet can be found in the Pay Table section below.

Dealer Bust

May show as "Bust".

This is a type of a side bet that allows the players to bet that the dealer hand will result in a bust. The card that the dealer bust with is responsible for the related payout.

Perfect Pairs

May show as "Pairs".

This is a type of a side bet that allows the players to bet that the first two cards dealt to the player will be a pair. The rank, suit, and color combination determine the payout.

21+3

This is a type of a side bet that allows the players to bet that the first two cards dealt to the player, combined with the first card dealt to the dealer, will make a three-card poker hand against the following list of winning hands:

Suited Three of a Kind - All three cards of the same suit and value

Straight Flush - All three in sequence and of the same suit

Three of a Kind - All three of the same ranking

Straight - All three cards in sequence but not the same suit

Flush - All three cards of the same suit

Options

Game Audio

Options	Description
Off	Shuts off game sounds.
Low	Plays game sounds on low volume.
High	Plays game sounds on high volume.

Hide Chip Value

Options	Description
