

# DraftKings Roulette Lite NOW

## Rules

### [Overview](#)

The Player's objective is to correctly predict, by placing bets, where the ball will land when spun on a 38-spaced roulette wheel. Roulette Lite NOW is played on a traditional American Roulette Wheel consisting of a 38-spaced wheel, which contains all numbers 1 through 36, inclusive, a single 0, and a double 0. After the Player has placed their bets, the ball is spun to determine the winning result. Bets are paid out according to the game's Pay Table.

### [How to Play Roulette Lite NOW](#)

1. The Player places their desired bets.
2. The Player begins the game by pressing either the Spin or Rebet & Spin buttons. Once the wheel spin sequence begins all bets are closed.
3. The ball spins in a track around the outer edge of the roulette wheel and eventually settles into one of the numbered ball pockets.
4. The position of the ball determines the results and awards are paid out according to the Pay Table.

### [Initial Bet](#)

In each new round, the Player has the option to place a new bet. To place a new bet:

1. The player can change the current bet denomination by tapping the Chip button.
2. A bet can be placed by tapping an eligible betting location on the board or by dragging and dropping the selected chip to the desired betting location. Adding a chip to the board also adds the value represented by the chip to the Player's bet.
3. The Player can increase their bet by placing additional bets, one chip at a time, until they have reached their desired bet or the bet's maximum.
4. Once the game's minimum bet is reached, the Player can begin the game by pressing the Spin button.
5. Chips placed on the board will always color up to higher value chips, so the total bet placed per betting location is represented with the fewest chips possible.

6. While betting the following options are available to the Player:

| Option | Result                                                 |
